

Claims

[c1] What is claimed is:

1. A folder-style electronic device comprising:
a first unit;
a second unit; and
a double hinge structure utilized for connecting the first unit and the second unit and making the first unit rotate to a first position directly on top of the second unit or to a second position directly underneath the second unit.

[c2] 2. The folder-style electronic device of claim 1, wherein the first unit is a screen utilized for displaying.

[c3] 3. The folder-style electronic device of claim 1, wherein the second unit is an input area utilized for inputting instructions.

[c4] 4. The folder-style electronic device of claim 1, wherein the first unit comprises at least a fastener location utilized for connecting the double hinge structure.

[c5] 5. The folder-style electronic device of claim 4, wherein the second unit comprises at least a fastener location utilized for connecting the double hinge structure.

- [c6] 6. The folder-style electronic device of claim 5, wherein the double hinge structure comprises:
a plurality of bolts;
at least a plate installed and rotatable on the plurality of bolts; and
a plurality of fasteners installed and rotatable on the plurality of bolts.
- [c7] 7. The double hinge structure of claim 6, wherein each of the plurality of fasteners is respectively attached to a corresponding fastener location.
- [c8] 8. A double hinge structure comprising:
a plurality of bolts;
at least a plate installed and rotatable on the plurality of bolts; and
a plurality of fasteners installed and rotatable on the plurality of bolts.
- [c9] 9. The double hinge structure of claim 8, wherein the double hinge structure is utilized in a folder-style electronic device.
